Autonomous Incident Response & Forensic Report | Incident ID: 57694794-bb1b-4700-9acc-5ad3b16fc4a8
Generated at: 2026-08-24 16:19:31 UTC

Field	Value	Field	Value
Attack Type	PortScan	Detection Confidence	100.0%
Risk Score	8.3/10.0 (HIGH)	Autonomous Action	TEMP_BAN_IP
Source IP	192.168.1.50	Destination IP / Port	192.168.1.10:3389
Protocol	IP Proto 6	Rule Matched	threshold_high

1. Threat Analysis & MITRE ATT&CK; Mapping

MITRE Technique ID	T1046
Technique Name	Network Service Discovery
Tactic	Discovery
Signature Match	SIG_RECON_PORTSCAN_SYN_SWEEP
Forensic Explanation	Rapid SYN probes (138.9 pkts/s) targeting port 3389. Zero/minimal ACK acknowledgments indicate port s

2. Forensic Evidence Indicators

- **Indicator 1:** Elevated SYN flag transmission (5 SYN pkts)
- **Indicator 2:** High packet velocity (138.9 pkts/s) with minimal return traffic
- **Indicator 3:** Asymmetric connection attempt toward target port 3389

3. GenAI SOC Analyst Plain-English Assessment

Executive Summary: Adversary host 192.168.1.50 initiated a reconnaissance SYN scan across network services. SentinelAI autonomous firewall triggered action 'TEMP_BAN_IP' to isolate the probing source.

Technical Root Cause: Observed rapid transmission of 5 SYN packets with minimal ACK responses at a rate of 138.9 pkts/s targeting port 3389.

Recommended Next Steps:

- Verify firewall block rule for IP 192.168.1.50.
- Inspect external firewall logs for other sweep targets from 192.168.1.50.
- Ensure services on port 3389 are patched and non-essential ports are closed.

4. Autonomous Enforcement & Mitigation State

Firewall Action	BLOCK
Rule Name	SentinelAI_Block_192.168.1.50
Status	SIMULATED

Command Executed	netsh advfirewall firewall add rule name="SentinelAI_Block_192.168.1.50" dir=in action=block remoteip=192.168.1.50
